

## INTEX SYSTEMS LTD

### ENVIRONMENTAL POLICY STATEMENT

Intex Systems Ltd (the *Company*) acknowledges and accepts its duties regarding environmental protection and is committed to operating as a responsible member of the local, national and global communities in which we work. The Company views the prevention and control of environmental hazards and their associated adverse impacts as an integral core business value and will seek to ensure that the Company is developed in an environmentally sustainable manner wherever possible.

The Director(s) recognises that they have ultimate responsibility for the environment. The Company's objective is to cause zero harm; environmental incidents not inevitable and the Company is committed to continual improvement in environmental performance, its ultimate goal being ZERO INCIDENTS.

Project Management Teams are responsible for ensuring that the highest standards of environmental management are established, and highest standards of environmental awareness maintained. Care for the environment must be a continual consideration for Directors, Managers, Supervisors, Operatives and Sub-Contractors at all levels within the Company and everyone must take individual responsibility to ensure that environmental issues are carefully considered giving regard to any potential negative impacts on both the local and wider environments. Commitment to the principals of the Company's Environmental Policy and to attaining its goals is an essential core value and must be clearly demonstrated at all times.

The Company is committed to minimising our effect upon on the local environments in which we work by:

- Maintaining and improving the quality of life within the local community in which we work and the wider communities where our Projects take place
- Minimising the impact of our operations on the local communities in which we work

The Company is committed to minimising our effect upon on the wider environment by:

- Conserving natural resources as much as possible; particularly those which are scarce or none-renewable
- Ensuring raw materials and used products from our operations are stored and wastes are disposed of in a manner to avoid any adverse effects to either man or the environment
- Ethically purchasing raw materials from sustainable sources wherever practical and possible

The Company is committed to continually improving its environmental performance by:

- Complying with and where appropriate and feasible, improving upon or exceeding the requirements of all relevant and applicable Environmental Protection Legislation and Regulations
- Operating an Environmental Management System in line with the requirements of ISO: 14001 and setting annual targets and objectives which drive continual improvement and performance year-on-year

The environmental custody of the Company is vested in:
